WORK EXPERIENCE

Qace Tech

Senior Software Engineer (Contract)

Lagos, Nigeria

May 2026 – till date

Qace Tech delivers world-class software testing, on-demand QA talent, and certification-grade training from our engineering hub in Africa to teams across the UK, US, Middle East, and beyond.

Contact Platform (Panera Solutions)

Technical Lead / Full-Stack Developer (Freelance)

Lagos, Nigeria.

September 2025 – April 2026

Contact is a SaaS platform enabling businesses to engage customers via WhatsApp with integrated payments and automation. (<https://usecontact.com>)

- Led end-to-end development of Contact, a WhatsApp-based customer engagement and payment platform.
- Architected and built a **scalable full-stack** solution using **Next.js**, **TypeScript**, **Nest JS**(with Prisma), and **PostgreSQL** (Supabase).
- Integrated **WhatsApp Business API** (with Facebook Meta-AI) to support automated messaging and customer interactions.
- Implemented **secure payment workflows** using **Paystack**, enabling seamless transaction processing.
- Designed responsive, animated user experiences using **Framer Motion**, improving usability and product polish.
- Deployed and maintained production infrastructure on **Vercel**, ensuring reliability and fast iteration.

Tech Stack: Next.js, Nest JS, TypeScript, Prisma, PostgreSQL, Framer Motion.

Integrations: WhatsApp Business API, Paystack

Deployment: Vercel

Cunningham Global Travels

Development Team Lead

Lagos, Nigeria

June 2025 – September 2025

Cunningham Global Travels is a modern travel and car rental platform enabling users to discover destinations, browse rentals, and book travel services online.

(<https://www.cunninghamglobaltravels.com/>)

- Served as sole developer and technical lead for a full-featured travel and rental web application.
- Built a high-performance, user-friendly platform using Next.js, React, TypeScript, and Tailwind CSS for the frontend and ASP.Net Core for its Backend.
- Integrated third-party services including **Amadeus API** (travel data), **Tiqwa API**, and **Paystack** for secure payments.
- Designed scalable backend services using **ASP.NET Core 8** with **PostgreSQL**.
- Deployed and maintained production infrastructure on **Microsoft Azure**, ensuring reliability and performance.

Tech Stack:

Next.js, React, TypeScript, Tailwind CSS, ASP.NET Core 8

Integrations: Amadeus API, Tiqwa API, Paystack

Database & Infra: PostgreSQL, Azure

Betaslides LTD

Technical Team Lead

Toronto, Canada

February 2025 – May 2025

- Led a **distributed team of 4 developers** using Agile practices to deliver the Betaslides product suite.
- Planned and tracked development milestones using **Jira and Excel**, ensuring on-time delivery.
- Oversaw system architecture, code reviews, and infrastructure decisions.
- Built and maintained the **Rivva platform service**, managing production infrastructure and API documentation. <https://rivva-server.onrender.com/docs>.

Senior Software Developer

January 2024 – Present

- Collaborated with external software consulting firm to develop the Betaslides Freelancing Platform for professional designers to outsource their design work whether it be Presentation, Digital Posters, Logo or Product Mock ups. As I was charged to develop the UI. [Website Link](#).
- Developed the Betaslides BDSA platform for both frontend and backend. [Link here](#)
- Development Technologies: ASP.NET Core 8 (MVC), Javascript, Bootstrap, React Next JS.
- Service Integrations: Paystack, Stripe and Zendesk
- Development Tools: Visual Studio 2022, Visual Studio Code.
- Deployment Server: Azure with CI/CD process using GitHub

Tech Stack: ASP.NET Core 8 (MVC), React (Next.js), JavaScript, Bootstrap

Integrations: Paystack, Stripe, Zendesk

Infrastructure: Azure, GitHub CI/CD

GS1 Nigeria

Senior Software Developer

Lagos, Nigeria

October 2021 – June 2024

GS1 is a global standards organization driving digital transformation across supply chains, healthcare, and consumer goods.

- Led backend development of **mission-critical enterprise platforms** supporting GS1 Nigeria's nationwide operations and member management.
- Designed and implemented **secure API services** for the **GS1 Key Issuance System**, enabling issuance and validation of global identifiers (GTIN, GLN).
- Solely architected and developed the **GS1 Nigeria Core Administrative Platform**, managing member onboarding, subscriptions, billing, and reporting.

- Built multiple production systems including Verified by GS1, OneSource Services (API Platform) and **Automated Monthly Invoice Generator** using background scheduling
- Implemented **real-time product data synchronization** using **GDSN**, in collaboration with **B-SYNC BYRD (France)**.
- Applied **Clean Architecture, Domain-Driven Design (DDD), and CQRS**, improving maintainability, scalability, and long-term system stability.

Tech Stack: ASP.NET Core (6–8), Entity Framework Core, Dapper, MS SQL, Vue.js (2 & 3), TypeScript, Hangfire, Topshelf.

Integrations: GS1 Global Key Issuance Identity, GDSN.

Tools & Infrastructure:

- ✓ Visual Studio 2019/2022, Git, Lucidchart
- ✓ **Deployment on Kamatera & Inter-Server infrastructure**
